

1 Phase Polemounted oil filled distribution transformer

Cam Tran overhead transformers can be manufactured to meet most specifications. Standard design is 1-HV bushing manufactured to meet CSA, ANSI or REA standards. They can be provided in either mild steel or stainless steel tanks. There are a number of additional coating options to combat corrosion that we would look forward to discussing with you upon request.

RATING:

5 - 250kVA

VOLTAGE CLASS:

1.2 –34.5 kv

OPTIONS:

- CSP - Tap Changer
- Magnex Breaker - Multi Voltage Windings
- Load Break Switch
- Clamp or Spade Type
- LV Bushing
- IFD - Internal Fault Detector
